Buzzards Bay Citizens' Water Quality Monitoring Program

2019 Volunteer Training Schedule

Training usually takes between 60-90 minutes for everyone to review sampling methods, calibrate equipment, answer questions and give out supplies (new test kit chemicals and data sheets). You can attend any session that is most convenient for you. If you cannot make any of these sessions, please call or email to arrange a time so we can get you all the supplies and review the sampling procedure.

Date	Time	Location
Wednesday, May 8	9:00am	Westport River Watershed Alliance office (primarily for Westport River monitors)
Tuesday, May 14	8:30am	Mattapoisett Town Pier
Tuesday, May 14	5:00pm	Besse Park dock, Wareham River (Near Rt. 6 Bridge, Narrows)
Wednesday, May 22	10:00am	Lloyd Center for Environmental Studies, S. Dartmouth
Thursday, May 23	5:00pm	West Falmouth Harbor, Town Dock, Dock Rd.
Tuesday, May 28	5:00pm	Marion Science and Field Operations Facility, 173 Spring Street, Marion

If you have your kit, please bring it so we can test it. Tony will be giving out kits, new chemicals, data sheets, tide charts, and the 2019 sampling schedule. All volunteers will perform a dissolved oxygen analysis and we will check equipment. It is important that *everyone* review the sampling techniques each year for our EPA and state-approved monitoring plan.

Looking forward to another great summer.
Thanks again for your help.
